

## **CB Power to Represent Indeck Power in Ontario & Maritimes**

### **Indeck Boiler Line is Ideal for Canadian Power Generation**

Wheeling, Illinois... Indeck Power Equipment Company and CB Power and Industrial are pleased to announce that they have reached an agreement for CB Power to represent Indeck Power Equipment for Ontario and the Maritimes. With the team of CB Power and Indeck Power, Canadian industries will benefit both from the extensive engineering expertise and an excellent boiler offering.

Michael Kessler, Indeck Marketing and Business Development Manager remarked, "We are delighted to have CB Power and Industrial on board with us. Indeck has a well established Canadian presence with our St. Hyacinthe, Quebec, formerly the Volcano Boiler plant. The Canadian marketplace is important to Indeck and our partnership with CB Power is a good fit for continuing to develop and offer high quality boiler products and rental boilers in Eastern Canada". Indeck Power's historical roots also include the quality brands of Erie City Iron Works, Zurn Energy Div., Aalborg, and Erie Power Steam Generators in addition to Volcano.

Jim Wywrot, President of CB Power and Industrial explained, "The union is particularly timely as the market transitions from large centralized power plants to a balance of large units with small to medium decentralized units. Indeck provides the large field erected units in addition to smaller units. These boilers can run traditional fuels as well as bio-mass fuels. With this partnership we are well positioned to take a leadership role in helping companies utilize their waste products to generate electricity and heat for their industrial and agri-business processes. Indeck Power is an excellent addition and compliments the line up of highly engineered equipment that CB Power provides for power-generation equipment".

CB Power and Industrial is headquartered in Cambridge with an office in London, Canada and can be reached at [www.cbpower.co](http://www.cbpower.co) or at (519)624-6177. Indeck corporate headquarters are just north of Chicago in Wheeling, IL, additional information can be obtained at [www.indeck.com](http://www.indeck.com).

###

### **ABOUT CB POWER**

CB Power and Industrial Equipment Sales is a manufacturer's representative corporation that has been sourcing and servicing new, replacement and spare parts of industrial equipment in Southwest Ontario for over 50 years. CB Power and Industrial Equipment understands both new and used industrial equipment.

Offerings include boilers, custom heavy duty fans, dampers and expansion joints, electrostatic precipitators, air cooled heat exchangers, multistage blowers, steam turbines, FRP fans and thermal oxidizers. The firm serves electric utilities, cement plants, steel plants, mining and minerals, pulp and paper mills, and all general industrial plants. CB Power and Industrial is headquartered in Cambridge with an office in London, Canada and can be reached at [www.cbpower.co](http://www.cbpower.co).

#### **ABOUT INDECK POWER EQUIPMENT COMPANY**

Indeck Power Equipment Company is a part of the Indeck Group of Companies that also includes Indeck Boiler Corporation, Indeck Service Corporation, Indeck Energy Services Incorporated and Indeck Keystone Energy, LLC. The Indeck Group is engaged in the design, manufacturing and marketing of high quality steam generation systems and water treatment systems for all industries and market segments worldwide. This includes providing on-site boiler system repair and maintenance services. Indeck has been a leading supplier of rental boilers, chillers and generators since 1960 and owns the largest inventory of rental boilers and packaged boilers from 10 HP to 300,000 PPH, immediately available for lease, rental or sale.
