

Logue Engineering to Represent Indeck Power in New England
A Team Vested in Over 100 Years of Industry Experience

Wheeling, Illinois... Indeck Power Equipment Company and Logue Engineering are pleased to announce that they have signed an agreement for Logue Engineering to represent Indeck Power Equipment in the states of Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont. With the team of Logue Engineering and Indeck Power, area industries and institutions will benefit both from the extensive engineering expertise and an excellent boiler offering.

Chris Petcos, Indeck-Keystone Energy Vice President and General Manager stated, “It is great to have Logue Engineering working again with Indeck. It is exciting to work with a firm that has vested over a century of construction and engineering experience in the New England region. Indeck Power is also deeply connected to the region having the noted Keystone, Erie City®, Zurn Energy® and Volcano® product lines under Indeck company ownership. Indeck offers custom steam and hot water generating solutions as well as ready to go boiler rentals.”

Logue Engineering started in 1975 with a concentration in the pulp and paper, power, process and wood products industries. The firm also focuses on utilities, institutions, hospitals and universities. In 1988 they became the representatives of Zurn Energy Division and worked on many (ZURN) Indeck projects. Jim Logue, comments, “It is great to be working with Indeck and are excited to be selling the Indeck product lines including Volcano®, Erie City®, Zurn®, Aalborg®, IBC and IBW. We can now offer a complete selection of Indeck boiler designs including “A”, “O”, “D”, Modular “D” type steam boilers along with the Lamont® International Boiler Works (IBW) high temp hot water generators as well as stock boiler units.”

Logue Engineering is based in Hingham, Massachusetts and can be reached at (781)749-8512. To find out additional information and to see the historical roots of the Logue tradition in building and engineering see their website: www.logueengineering.com. The Charles Logue Building Company handled the building of Boston’s Fenway Park. Logue Engineering was founded by Charles’ great grandson Jim in 1975. In 2006, J. Kevin Logue joined the company and this represents five generations in construction and engineering for New England.

Indeck Power Equipment Company was founded in 1960, just celebrating a half century of

business in the power industry, having become the first emergency rental boiler company in the United States. Indeck owns the largest inventory of rental boilers and package boilers from 10 HP to 300,000 PPH, immediately available for lease, rental or sale. Indeck corporate headquarters are in Wheeling, Illinois and the Indeck-Keystone Energy division is located in Erie City, Pennsylvania. Additional information can be obtained at the Indeck website: www.indeck.com.
