## **Indeck Group of Companies to Attend 2019 IDEA Conference**

**Wheeling, IL ...** Prominent steam power leader Indeck Power Equipment Company will be attending the 2019 annual IDEA Conference. The 110th assembly will be held in Pittsburgh, PA June 24-27.

Indeck has been presenting its steam and hot water generation solutions and technologies at the IDEA annual conference since 2004. This year, Indeck will highlight products and services that look toward the future. With environmentally conscious equipment, state-of-the-art safety/automation technologies, and tangible project management solutions applicable to microgrid planning, Indeck has been a trusted single-source provider of steam and hot water generation systems for many decades.

Since its founding in 1909, The International District Energy Association (formerly, the National District Heating Association) has been committed to informing, connecting, and advancing the district energy industry around the globe<sup>1</sup>. Although the 2019 conference will feature a variety of subjects within the district energy industry, the flagship topic for the 2019 conference is "The Energy for More Resilient Cities".

With new technologies and compliance regulations being introduced to the energy and power industries at increasing rates, now more than ever the need for reliable heat and power equipment from a knowledgeable engineering partner is a must. Connect with Indeck June 24 – 27 at Booth #30 in Pittsburgh, PA to learn how Indeck's technologies and services are the perfect solution for any facility with dynamic district heat and power needs.

### **About Indeck Group of Companies:**

*Indeck Power Equipment Company is the largest single-source provider of steam power and hot water solutions. Indeck is engaged in the design, manufacturing and distribution (purchase, lease or rental) of high-quality steam and hot water generation systems. Managing one of the largest fleets of boilers in the world, Indeck proudly carries watertube boilers, mobile boiler rooms, packaged boilers to 250,000 PPH, superheat boilers, saturated boilers, high-temperature hot water generators, deaerators, feedwater pumps, blowdown tanks, valves, controls, hot water systems, and more. Indeck's trusted boiler styles include "A", "O", "D", Modular "D" type boilers and International-LaMont High-Temperature Hot Water Generators. Indeck maintains a dedicated 24/7 emergency hotline for rental boilers, used boilers, or new boilers.*

*Indeck Keystone Energy, LLC custom designs Heat Recovery Steam Generators (HRSG)s, waste heat boilers, Fluidized Catalytic Cracker Units (FCCU)s, solid fuel boilers and specialty boilers up to 1,000,000 PPH and 2,000 PSIG. Indeck is an OEM aftermarket parts supplier for Indeck, Keystone Energy, Erie City, Zurn Energy Division, Aalborg Land Based Boilers, IBC, International Boiler Works, ThermoFlo, Travagrate, Starfire and Volcano Boiler.*
